 - Keeps vehicles looking cleaner for longer
 - Reduces costly environmental damage repair
- Warranted against Australian environmental damages including:
 - Acid rain
 - Berry & fruit stains
 - Bug splutter
 - Bird droppings
 - Bat droppings
 - Discolouration/ fading
 - Grime
 - Grease & road tar
 - Industrial fallout
 - Sun/ UV damage
 - Salt spray
 - Tree sap
 - Oxidisation
 - Water marks
- National 20yr warranty*

Protects against common environmental contaminants

SILICA OXIDE + TITANIUM OXIDE + FLUOROPOLYMERS COMPOSITION

An Australian inorganic self-levelling finish to bond to prestige paintwork, creating a smooth as glass, tough as nails, ceramic surface. The nano-particles fill grooves of porous paintwork, providing an ultra-strong barrier against environmental chemical & physical reactions. With hydrophobic & oleophobic properties, it repels water, oil/ grease, allowing water to bead off the slippery surface.

PROUDLY AUSTRALIAN WITH SUPERIOR TESTING
